Tête dans la courbe. Triangle dans vêtement sur le bras pointe ou pointait le bout du pied. Le X de la hache pointe le prochain lieu, la hache au complet suit la forme du chemin.

Head in the curve. Triangle in clothing on the arm points or pointed the end of the foot. The X of the ax points to the next place, the entire ax follows the shape of the path.

Bout de la hache sur Christensen fontaine, creux dans le dos et les zones de végétations différentes à droite du triangle de la fourche sur le terrain, similaire a une des fenêtres de l'image. La ligne bleutée suit parfaitement le chemin et nous dirige vers la zone de végétation. La zone au bas du dos et début du vêtement en haut des fesses indique une zone incluant un point blanc dans une zone dégagé sur le terrain.

End of the ax on Christensen fountain, hollow in the back and areas of different vegetation to the right of the fork triangle on the ground, similar of one window on image Tribute. The bluish line follows the path perfectly and leads us to the vegetation area. The area at the bottom of the back and the beginning of the garment at the top of the buttocks indicates an area including a white dot in an open area on the ground.

Possibilité selon analyse des autres indices que cela soit 8° ou 80°

Plus probable que cela soit 8 degré car on arrive à la pierre du centre de la fontaine Christensen

Pour le nombre de pas c'est 8 = 24 pieds ce qui arrive très bien avec les autres marques.

Azimut de 162 degré si 8 degré d'écart ou azimut de 160 degré si 80 degré

Possibility according to analysis of other indices whether it is 8o or 80o

More likely to be 8 degrees as you reach the center stone of the Christensen fountain

For the number of steps it is 8 = 24 feet which happens very well with the other brands.

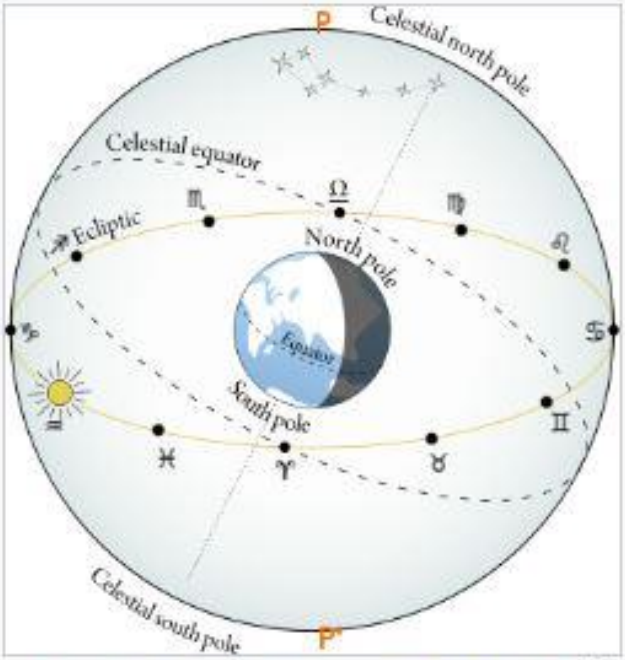
Les symboles des signes du zodiaque représentés sur le cercle (jaune) de l'écliptique. Le point vernal (qui est le point de départ) est l'une des deux intersections entre l'écliptique et l'équateur céleste.



The twelve ecliptic signs. Each dot marks the start of a sign and they are separated by 30°. The intersection of the celestial equator and the ecliptic define the equinoctial points: First Point of Aries (♈) and First Point of Libra (♎). The great circle containing the celestial poles and the ecliptic poles (P and P'), intersect the ecliptic at 0° Cancer (♋) and 0° Capricorn (♑). In this illustration, the Sun is schematically positioned at the start of Aquarius (♒).
